Texas Water Development Board rules governing the Clean Water State Revolving Fund program (Texas Administrative Code, Title 31, Part 10, Chapter 375) may be accessed online at  
[http://texreg.sos.state.tx.us/public/readtac\\$ext.ViewTAC?tac\\_view=4&ti=31&pt=10&ch=375](http://texreg.sos.state.tx.us/public/readtac$ext.ViewTAC?tac_view=4&ti=31&pt=10&ch=375)

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**I. Introduction and Purpose of the Intended Use Plan**

In 1987 Congress passed federal amendments to the Clean Water Act (CWA) that established the Clean Water State Revolving Fund (CWSRF) program. The Texas Water Development Board (TWDB) is authorized by state law to administer this program for Texas.

Annually, the state must prepare an Intended Use Plan (IUP) that describes how it intends to use CWSRF program funds to support the overall goals of the program. The IUP must contain a number of elements required by the Environmental Protection Agency (EPA) covering the operation of the CWSRF and is a central component of the TWDB's application to EPA for the capitalization grant.

Texas is eligible for a \$63,756,000 capitalization grant from funds appropriated by Congress for Federal Fiscal Year (FFY) 2015. The TWDB will use the grant, along with other available sources of funds, to provide \$525,000,000 for projects in this SFY 2016 IUP. The sources of funds include the FFY 2015 capitalization grant, state match, principal and interest repayments from financial assistance, investment earnings, additional cash resources, and if demand warrants, the net proceeds from bond issues. The CWSRF program is required to offer both below-market interest rates and additional subsidization. The additional subsidization is offered in the form of principal forgiveness to eligible disadvantaged communities and green projects. Throughout the IUP, this principal forgiveness may be referred to as Additional Subsidization, Subsidized Green funding or Disadvantaged Community funding. The demand for this principal forgiveness funding far outpaces its availability. Therefore, entities invited to submit applications for principal forgiveness funding are strongly encouraged to apply as soon as possible after receiving their invitation.

The IUP's priority list of projects is subdivided into the Initial Invited Projects List (Appendix K), which represents the projects that will be invited to submit applications after Board approval of the IUP. After the initial invitation round, applications for funding under this SFY 2016 IUP will be accepted on a first-come, first-served basis year-round until the SFY 2017 IUP is approved.

**II. Description of the Clean Water State Revolving Fund Program**

The CWSRF provides below market-rate financial assistance and various levels of principal forgiveness to finance projects that facilitate compliance with the water pollution control requirements of the CWA. The CWSRF is authorized by the CWA to provide financial assistance for the construction of publicly owned treatment works defined under Section 212; the funding of nonpoint source projects under Section 319; and the funding of estuary protection projects under Section 320. Throughout this document we refer to these types of projects simply as publicly owned treatment works, nonpoint source, and estuary or estuary management projects. In addition, the Water Resources Reform and Development Act (WRRDA) of 2014 increased the types of projects eligible under the CWSRF.

**Texas Water Development Board**  
**SFY 2016 Clean Water State Revolving Fund**  
**Intended Use Plan**

**A. Eligible Applicants**

Applicants eligible to apply for assistance include:

- Wastewater treatment management agencies, including interstate agencies
- Cities, commissions, counties, districts, river authorities, or other public bodies created by or pursuant to state law that have authority to dispose of sewage, industrial waste, or other waste
- Authorized Indian tribal organizations; and
- Private entities, including water supply corporations, for nonpoint source projects or estuary projects only

**B. Eligible and Ineligible Use of Funds**

1. Examples of eligible project costs include planning, acquisition (for certain purposes), design, and construction of projects to:

- Create or improve wastewater treatment facilities, reuse/recycle facilities, and collection systems
- Purchase existing wastewater treatment plants
- Control nonpoint source pollution
- Manage estuaries
- Implement green projects (pursuant to EPA guidance)
- Pay for other costs necessary to secure or issue debt
- Purchase land necessary for construction on an eligible project
- Manage, reduce, treat, or recapture stormwater or subsurface drainage water
- Reduce the demand for publically owned treatment works capacity through water conservation, efficiency, or reuse (for political subdivisions only)
- Develop and implement watershed pilot projects
- Reduce the energy consumption needs for publically owned treatment works (for political subdivisions only)
- Re-use or recycle wastewater, stormwater, or subsurface drainage water.
- Increase the security of publically owned treatment works

2. Examples of ineligible project costs include:

- Projects primarily intended to facilitate growth
- Publically Owned Treatment Works (POTW) (as defined in Section 212) projects for systems that are owned by private or nonprofit entities, including water supply corporations
- Treatment works owned or operated by a federal agency
- Excavation, testing, remediation, or disposal of hazardous, contaminated, or potentially contaminated material

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**III. Significant Program Changes**

Significant program changes from the previous year's IUP are highlighted below.

**1. Incorporates changes required by the Water Resources Reform and Development Act of 2014 (WRRDA):**

- (a) Affordability Criteria (Appendix D) – The IUP incorporates new affordability criteria based on income, unemployment rates, and population trends.
- (b) Additional Subsidization Eligibility (Section IV.A.2.) – additional subsidization may be provided only to disadvantaged communities based on affordability criteria and for other specifically authorized purposes. In accordance with WRRDA, the CWSRF may only provide additional subsidization to a municipality or intermunicipal, interstate, or State agency.
- (c) Environmental Review (Sections IV.A.1 and Appendix E.A.3.) - National Environmental Policy Act (NEPA)-like environmental reviews are required for all CWSRF assistance for the construction of treatment works.
- (d) Generally Accepted Accounting Principles (GAAP) (Sections IV.A.1 and Appendix E.A.4.) - Assistance recipients must maintain project accounts according to Generally Accepted Accounting Principles.
- (e) Cost and Effectiveness Analysis (Sections IV.A.1 and Appendix E.A.5.) - A municipality or intermunicipal, interstate, or State agency that receives assistance from the CWSRF must certify that they have conducted a cost and effectiveness analysis.
- (f) Architectural and Engineering contracts (Sections IV.A.1 and Appendix E.A.6.) - for equivalency projects only, architectural and engineering contracts to be funded with CWSRF funds must be negotiated using the federal procurement standards.
- (g) Fiscal Sustainability Plan (Sections IV.A.1 and Appendix E.A.7.) – A recipient of a loan through a loan agreement, for a project that involves the repair, replacement, or expansion of a publicly owned treatment works (POTW), must develop and implement a fiscal sustainability plan or certify that it has already developed and implemented one. (This applies to a recipient of a loan only through a loan agreement and does not apply to financial assistance involving the TWDB's purchase of the recipient's bonds.)

**2. Cost Savings from SRF Financing (Section V) –** The IUP now includes an illustration of the significant cost savings that may be possible when using the CWSRF compared to market rate financing.

**3. Carryover of Project Information Forms (Section VII.B.) -** SFY 2016 is the last year that projects from the prior IUP will be automatically rolled forward to the subsequent IUP.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

- 4. Water Loss Mitigation (Section VII.I)** – Implements state law that requires a retail public utility to mitigate water losses that meet or exceed a specific threshold.
- 5. Commitment Timeframes for Additional Subsidization (Section VII.K)** – Establishes TWDB commitment timeframes for projects that have been designated to receive additional subsidization.
- 6. Closing Deadlines for Commitments with Principal Forgiveness (Section VII.L)** – Requires TWDB commitments that include principal forgiveness funding concurrently with bonds/loan funding to close within six months from the date of the TWDB commitment. Commitments for bonds/loan funding without any principal forgiveness funding continue with a one-year closing requirement.
- 7. Multi-Year Commitments (Section VIII)** - The TWDB now offers multi-year commitments to assist entities that need to fund large projects over a period of time.

#### **IV. Funding Available**

##### **A. Requirements, Allocations, and Reserves**

###### **1. Federal Requirements on Available Funds**

All funds are subject to certain federal requirements such as the (a) Davis-Bacon Act prevailing wage provision, (b) NEPA-like environmental review, (c) Generally Accepted Accounting Principles, (d) Cost and Effectiveness Analysis (for municipality or intermunicipal, interstate, or State agencies only) and (e) American Iron and Steel requirements.

A portion of the CWSRF funds, in an amount equal to the federal capitalization grant, must follow all federal cross-cutters. These CWSRF-funded projects are referred to as Equivalency projects. The federal cross cutters that apply to Equivalency projects include compliance with EPA's Disadvantaged Business Enterprise program administered by TWDB. Equivalency projects receive an additional interest rate reduction of 35 basis points over the 120 basis point reduction for non-equivalency projects. Equivalency projects must also follow the requirements associated with Architectural and Engineering contracts funded directly with CWSRF and the EPA signage requirements. Furthermore, a recipient of a loan through a loan agreement for a project that involves the repair, replacement, or expansion of a publicly owned treatment works (POTW) must develop and implement a fiscal sustainability plan or certify that it has already developed and implemented a fiscal sustainability plan. This applies to a recipient of a loan only through a loan agreement and does not apply to financial assistance involving the TWDB's purchase of the recipient's bonds. (see Appendix E for details of Federal Requirements)

###### **2. Allocations of Available Funds**

A total of \$525,000,000 is available for SFY 2016. The total amount of equivalency

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

projects for SFY 2016 will be at least \$63,756,000, which is the amount of the FFY 2015 capitalization grant. The amount of funds available is allocated to the following funding options.

**Funds Available**

<b>Funding Option</b>	<b>Allocation</b>
Additional Subsidization:	
a. Disadvantaged Communities ( <u>Equivalency only</u> )	\$14,345,100
b. Other Purposes ( <u>Equivalency</u> or <u>Non-Equivalency</u> )	\$4,781,700
Bonds/Loans (Equivalency or Non-Equivalency)	\$505,873,200
<b>Total</b>	<b>\$525,000,000</b>

Additional subsidization is provided in the form of principal forgiveness to Disadvantaged Communities. Other Purposes are water efficiency, energy efficiency, mitigation of stormwater runoff, and encouragement of sustainable project planning, design, and construction, which includes Subsidized Green.

***In accordance with the WRRDA, the CWSRF may only provide additional subsidization to a municipality or intermunicipal, interstate, or State agency. Private and non-profit entities, including water supply corporations and water supply and sewer service corporations, are no longer directly eligible, although pass-through agreements from a municipality to these private and nonprofit entities are allowable.***

**3. Reserves Established from Available Funds**

The following reserve amounts may be applied to the funding options.

**Funding Reserves**

<b>Reserve</b>	<b>Amount</b>
Green Project Reserve (10% of capitalization grant) *	\$6,375,600
Small Communities (15% of capitalization grant)	\$9,563,400
Nonpoint Source/Estuary Management (7% of total funding available)	\$36,750,000
*This amount includes the funds allocated for green subsidy.	

The TWDB is required to ensure that an amount equivalent to 10% of the capitalization grant is allocated to approved green project costs. This amount is known as the Green Project Reserve (GPR). To encourage green projects, a portion of the additional subsidization will be made available for projects that include green components. In order to be eligible to receive green subsidy, projects must have approved green project elements with costs that equal or exceed 30% of the total project cost.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

A portion of the disadvantaged community and other additional subsidization, including subsidized green funding, is allocated to nonpoint source and estuary management projects. If they are not utilized, they may be offered to POTW projects.

**B. Leveraging to Provide Additional Funding**

The TWDB sells bonds to obtain additional funds that leverage the CWSRF program as necessary to meet the demand for funding additional clean water projects.

**C. Funds from Prior Years**

Additional funds that may become available through unobligated previous grant funds, or deobligation or closure of previous commitments will be available for eligible projects.

**D. Transfer of Funds**

Section 302 of the Safe Drinking Water Act (SDWA) Amendments of 1996 provides states the authority to reserve and transfer funds between the CWSRF and Drinking Water State Revolving Fund (DWSRF) programs. In accordance with Section 302, the TWDB hereby reserves the authority to transfer an amount up to thirty-three percent (33%) of the DWSRF program capitalization grant(s) to the CWSRF program or an equivalent amount from the CWSRF program to the DWSRF program.

**V. Cost Savings from SRF Financing**

The CWSRF program provides cost-effective funding that will result in significant savings compared to market rate financing. The chart below illustrates the estimated savings from using the CWSRF based on the Loan Comparison Calculator currently located on the TWDB website (<http://www.twdb.texas.gov/financial/index.asp>). The first example shows the estimated savings for a borrower with an AA market rating based on CWSRF financial assistance of \$10 Million over 30 years with an interest rate reduction of 120 basis points from the market rate.

Funding Option	Cost of Funds	CWSRF Amount of \$10,000,000 over 30 yrs.	
		Debt Service Payments over 30 Years	Present Value of Payments over 30 Years
Market – Borrower rating of AA	3.275%	\$15,905,539	\$11,522,865
CWSRF Non Equivalency	2.208%	\$13,813,431	\$10,000,000
<b>Savings Using CWSRF *</b>		<b>\$2,092,108</b>	<b>\$1,522,865</b>

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

The next example shows the estimated savings for a non-rated borrower based on CWSRF financial assistance of \$10 Million over 30 years with an interest rate reduction of 120 basis points from the market rate.

Funding Option	Cost of Funds	CWSRF Amount of \$10,000,000 over 30 yrs.	
		Debt Service Payments over 30 Years	Present Value of Payments over 30 Years
Market – Non-Rated Borrower	4.415%	\$18,302,544	\$11,398,464
CWSRF Non Equivalency	3.357%	\$16,071,285	\$10,000,000
<b>Savings Using CWSRF *</b>		<b>\$2,231,259</b>	<b>\$1,398,464</b>

\* Rates from the TWDB Loan Comparison Calculator were current as of July 9, 2015. A reduction of 120 basis points below market is given on the CWSRF Non-equivalency financial assistance and includes an origination fee of 1.85%. The Loan Comparison Calculator takes into account the origination fee but excludes the Cost of Issuance and the Underwriter's Discount. The example above is for illustrative purposes only.

## **VI. Clean Water State Revolving Fund Program Goals**

The primary goal of the Texas CWSRF program is the same as the CWA - to restore and maintain the chemical, physical, and biological integrity of the state's waters by preventing the discharge of pollutants. In addition, the overall goals of the CWSRF program are to prevent the discharge of pollutants from point and nonpoint sources; identify and provide funding for maintaining and/or bringing publicly owned treatment works into compliance with EPA clean water standards; to support affordable and sustainable wastewater treatment processes; and to maintain the long-term financial health of the program. Specific goals to achieve those ends are listed below.

### **A. Short-Term Goals**

1. Implement the programmatic changes required by WRRDA.
2. Encourage the use of green infrastructure and technologies by offering principal forgiveness for green infrastructure, energy efficiency, water efficiency, or environmentally innovative portions of projects.
3. Offer terms of up to 30 years for planning, acquisition, design, and/or construction in accordance with TWDB determined guidelines and the CWA.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

4. Provide financing to communities listed in the IUP that are under enforcement orders to meet the deadlines for compliance with the CWA.
5. Utilize, if necessary, the strength of the CWSRF to enhance the DWSRF by cross-collateralizing the programs in accordance with state and federal law.
6. Apply for the FFY 2015 grant during the first year that it is available as requested by EPA.
7. Enter into binding commitments that total 120% of the amount of the grant that will be allocated to projects.
8. Enhance our current level of outreach on the SRF programs by hosting regional financial assistance workshops and continued use of social media.

**B. Long-Term Goals**

1. Maintain the fiscal integrity of the CWSRF in perpetuity.
2. Employ the resources of the CWSRF in the most effective and efficient manner to prevent the discharge of pollutants into the state's waters, assist communities in maintaining compliance with EPA's clean water standards, and maintain a strong financial assistance program that is responsive to changes in the state's priorities and needs.
3. Assist borrowers in complying with the requirements of the CWA by meeting the demands for funding eligible projects by providing financial assistance with interest rates below current market levels and with additional subsidization in the form of principal forgiveness.
4. Support the development of POTW and other systems that employ effective utility management practices to build and maintain the level of financial, managerial and technical (FMT) capacity necessary to ensure long-term sustainability.

**VII. Criteria and Method of Distribution of Funds**

**A. Solicitation of Project information**

Project information was solicited from eligible entities across the state using direct emails, notices posted on the TWDB website, and regional financial assistance workshops held throughout the State. Potential applicants submitted Project Information Forms (PIFs) by the response deadline of March 2, 2015.

The required information submitted on a PIF consisted of:

- A detailed description of the proposed project
- A map(s) showing the location of the service area

**Texas Water Development Board**  
**SFY 2016 Clean Water State Revolving Fund**  
**Intended Use Plan**

- An estimated total project cost that is certified by a registered professional engineer if project costs are greater than \$100,000
- A checklist and schedule of milestones to determine a project's readiness to proceed to construction
- The population currently served by the applicant
- Green project information
- Signature of the applicant's authorized representative
- Additional information detailed within the solicitation for projects as needed to establish the priority rating

**B. Updating Projects from Prior Intended Use Plans**

For SFY 2016, projects that were included in the prior IUP's Project Priority List but were not funded during 2015 were automatically included in the project lists based on the number of priority points received in the year they were first accepted and rated. Individual rankings were not preserved and reflect all other projects being considered. An update form was available for entities wishing to update project information for a project that was carried forward.

SFY 2016 is the last year that projects from the prior IUP will be automatically rolled forward to the subsequent IUP without being updated. Beginning in SFY 2017, a potential applicant must update, at a minimum, the readiness to proceed information, and if seeking disadvantaged community eligibility, the socioeconomic economic census data and utility rate information. The requirement to update the readiness to proceed information beginning in SFY 2017 will apply to an entity that previously received a commitment for Planning, Acquisition and/or Design only and desires to be considered for the construction portion of the project.

**C. Evaluation of the Project Information Received and Priority Rating System**

All PIFs were evaluated by the TWDB and projects determined to be eligible for funding were scored and ranked according to the established rating criteria. The TWDB also evaluated the eligibility of projects for disadvantaged community funding, following the new affordability criteria used for determining eligibility as presented in Appendix D. Throughout the evaluation process, entities were contacted by staff if additional information was needed for clarifying their eligibility for disadvantaged status or effective management points.

The TWDB performed the priority rating of projects by assigning points for projects that addressed factors as described below, with details provided in Appendix C. For information on scoring for specific projects, a report detailing the scoring for each project will be posted on the TWDB's website.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**1. Rating Criteria for Publicly Owned Treatment Works Projects (§212 projects)**

- Enforcement action imposed by judicial or regulatory authorities.
- Water quality impacts that protect stream segments and groundwater from pollution.
- Serving unserved areas by bringing individual systems into a centralized system or addressing unsatisfactory on-site systems.
- Innovative or alternative technology or approaches to treatment.
- Regionalization of treatment works that will consolidate and eliminate systems.
- Reduction or prevention of sewer system overflows and inflow and infiltration.
- Reduction in demand for publically owned treatment works capacity through water conservation, efficiency, or reuse.

**2. Rating Criteria for Nonpoint Source (§319 projects) /Estuary Management Projects (§320 projects)**

Nonpoint source projects must be an identified practice within a water quality management plan, or must be a best management practice described or referenced in the Texas Nonpoint Source Management Program.

- Improving public health by addressing conditions that a public health official has determined are a nuisance and are dangerous to public health and safety. The conditions must result from water supply and sanitation problems in the area to be served by the proposed project.
- Protecting groundwater by minimization of the impact of pollutants to an aquifer or groundwater.
- Impaired water body improvements in any water body that does not meet applicable water quality standards or is threatened for one or more designated uses by one or more pollutants.

**3. Additional Rating Criteria for All Eligible Projects**

All projects may receive additional points for the following:

- The majority of the funds being requested from the SRF for the project are to be used to implement innovative approaches to manage, reduce, treat, or recapture stormwater or subsurface drainage water.
- The majority of the funds being requested from the SRF for the project are to be used to implement reuse or recycling wastewater, stormwater, or subsurface drainage water.
- Employ effective management strategies by adopting or planning to prepare an Asset

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Management Plan, providing training to the applicant's governing body and employees, addressing water conservation and energy efficiency, and implementing a project that is part of a state or regional water plan.

- Serving a disadvantaged community.

**D. Ranking and Creation of the Project Priority List and Initial Invited Projects List**

Each project submitted by the initial deadline and determined to be eligible is ranked from highest to lowest by the combined rating factors and included on the Project Priority List (PPL). In the event of ties in the rating, priority is given to the project serving the smaller total population. Project information submitted after the March 2<sup>nd</sup> deadline was not considered for rating purposes prior to adoption of the initial PPL. Following approval of the IUP, changes to a ranked project that result in a project no longer addressing the issues for which it was rated will require the project to be re-rated and re-ranked. Changes in the project that do not trigger re-rating and re-raking are:

1. The applicant for a proposed project changes but the project does not change;
2. The number of participants in a regional project changes and the change does not result in a change to the rating; or
3. The fundable amount of a proposed project does not increase by more than 10% of the amount listed in the approved IUP. The Executive Administrator may waive the 10% limit to incorporate additional elements to the project; however, any additional subsidization awarded may not exceed the original IUP amount's allocation.

The Initial Invited Projects List (IIPL) presented in the IUP (Appendix K) refers to a subset of projects from the PPL and includes only the projects to be invited to apply for funding during the initial invitation round following the Board's approval of the IUP. The IIPL includes the type and amount of funding necessary to meet requirements of the CWSRF, such as Additional Subsidization and Reserve requirements. Based on a review of readiness to proceed to construction, the TWDB determined which phases would be eligible to receive funding during SFY 2016. The phases indicated on the IIPL represent the phases deemed eligible based on that review. To fulfill the reserve established for construction projects, those projects representing only the construction phase that are ready to proceed receive a priority on the IIPL. If an entity is interested in applying for additional phases of the project not listed on the IIPL or not mentioned in the invitation letter, an updated Readiness to Proceed to Construction form must be submitted and an eligibility determination will be made by TWDB prior to the pre-application meeting.

Projects that received funding for planning, acquisition and/or design during SFY 2013, 2014, or 2015 were automatically added to the SFY 2016 PPL and the IIPL for construction phase funding based on the number of points they received in the year they were rated. Any invitation for construction phase funding is contingent upon the project having met the required ready to proceed milestones. Beginning in SFY 2017, an entity that previously

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

received a commitment for Planning, Acquisition and/or Design only and desires to be considered for the construction portion of the project must update, at a minimum, the readiness to proceed information.

For SFY 2016, the IIPL represents projects with costs exceeding the available amount of funds allocated for Equivalency projects. Once the amount of funds allocated to Equivalency projects has been reached, funds will be allocated to Non-Equivalency projects.

**E. Bypassing Projects**

The TWDB's Executive Administrator may decide to bypass, or skip, higher ranked projects in favor of lower ranked projects to ensure that funds available are utilized in a timely manner and that statutory and capitalization grant requirements are met. In addition, if an entity is offered funding for any project that has an interrelated project ranked lower on the list, the Executive Administrator has discretion to also offer funding for the interrelated project. Reasons for bypassing projects are discussed in Appendix F.

**F. Phases on the IIPL**

**1. Pre-Design Funding Option (or Planning, Acquisition, Design and Construction Funding)**

The pre-design funding option allows an applicant to receive a single commitment for all phases of a project. The construction portion of the project must be deemed ready to proceed before funds for the construction phase will be released.

**2. Construction Funding Only**

Projects on the IIPL that were determined to be ready to proceed to construction based on the current status of their planning, acquisition, and design activities will receive an invitation to fund the construction portion of the project.

For SFY 2016, the TWDB is reserving up to 70% of funds available for projects that requested Construction funding only, provided there are sufficient projects deemed ready to proceed.

**3. Planning, Acquisition, and Design Funding**

A project on the IIPL that has not completed planning, acquisition, and design activities and was not deemed ready to proceed to construction may receive an invitation to fund only the PAD portion of the project.

**G. Invitations and Application Submissions**

Entities with projects on the IIPL will be informed of the opportunity to submit an application for the project phases shown on the list using the funding options in the next section. **The projects listed on the IIPL that are interested in pursuing funding are encouraged to begin working on their applications upon publication of the draft IUP in order to have them administratively complete and ready to submit after the IUP is approved.** Prior

**Texas Water Development Board**  
**SFY 2016 Clean Water State Revolving Fund**  
**Intended Use Plan**

to submitting an application, entities are required to participate in a pre-application meeting to discuss the application process and project requirements. Invited applications from projects on the IIP that are received during the initial invitation round after Board approval of the IUP will be allotted funding for additional subsidization (principal forgiveness) based on rank order. All projects must be determined administratively complete as submitted or within 14 days from the date the applicant receives a notice to correct deficiencies or any additional subsidization may be re-allotted on a first-come, first-served basis.

Each application received by the TWDB will be reviewed to ensure that the required milestones have been met to allow funding of the phase(s) being requested. If the application review determines that a project is not ready to proceed for funding for the phase(s) being requested, the project may be bypassed for any additional subsidy amounts.

Entities invited for only planning, acquisition and/or design phases but wish to pursue Construction phase funding, may provide an updated Readiness to Proceed to Construction form for review.

Projects may be bypassed if an applicant fails to timely submit a complete application or additional requested information. After the initial invitation period, all other projects on the PPL will be invited and applications will be processed on a first-come, first-served basis, with funding allocations based on the date the application is considered administratively complete.

Applicants may submit a project information form at any time to be considered for inclusion on the amended PPL. Eligible projects will be rated and ranked and added to the project lists. Amendments to the project lists will undergo a 14-day public review period that will be advertised on the agency website. Once the project has been added to the amended PPL, the TWDB will send out an invitation to apply on a first-come, first-served basis provided funding is available.

## **H. Funding Options and Terms**

The CWSRF has two tiers of funding: Equivalency and Non-Equivalency.

**Equivalency (Federal Requirements)** - A portion of the CWSRF funds must follow all federal requirements commonly known as cross-cutters. This type of financial assistance is referred to as Equivalency and offers an interest rate of 155 basis points below the market rate based on a level debt service schedule. The TWDB requires applicants seeking Equivalency financial assistance to complete and submit a Pre-award Compliance Review Report which lists the federal requirements that apply to their project. More information on the federal cross-cutters may be found in Appendix E.

**Non-Equivalency (State Requirements)** - Non-Equivalency financial assistance is not subject to federal cross-cutter requirements, with the exception of the federal anti-discrimination laws, also known as the super cross-cutters. This type of assistance offers

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

an interest rate of 120 basis points below the market rate based on a level debt service schedule.

**1. Funding Options Available:**

Entities listed on the IIPPL and subsequent PPLs may be invited to apply for one of the following funding options.

**a. Disadvantaged Community Funding (Equivalency only)**

For an entity to qualify as a disadvantaged community, the community must meet the CWSRF's affordability criteria based on income, unemployment rates, and population trends. In addition, the entity must be eligible to receive additional subsidization. (See Appendix D for full details). In summary, the Annual Median Household Income (AMHI) of the entity's area to be served, must be less than or equal to 75% of the State's AMHI and the Household Cost Factor that considers income, unemployment rates, and population trends must be greater than or equal to 1% if only water or sewer service is provided or greater than or equal to 2% if both water and sewer service are provided. The percent of principal forgiveness is based on the difference between the calculated and minimum required household cost factors, as illustrated in the following table:

<b>Household Cost Factor Difference</b>	<b>Principal Forgiveness as a % of estimated CWSRF-funded project</b>
≥ 0% and < 1.5%	30%
≥ 1.5% and < 3%	50%
≥ 3%	70%

This funding option offers a financial assistance component with the interest rate subsidy and 30%, 50%, or 70% of the total project cost in principal forgiveness. The maximum repayment period is 30 years. The origination fee will not be applied to project costs that are funded with principal forgiveness. Additional information may be found in Appendix D.

**b. Subsidized Green Funding (Equivalency or Non-Equivalency)**

Entities may receive Subsidized Green principal forgiveness if their project has elements that are considered green and the cost of the green portion of their project is 30% or greater than the total project cost. The project may be eligible for additional subsidization by implementing a process, material, technique, or technology (i) to address water-efficiency goals; (ii) to address energy-efficiency goals; (iii) to mitigate stormwater runoff; or (iv) to encourage sustainable project planning, design, and construction. This funding option offers principal forgiveness for up to 15% of the total eligible green component costs and is available for

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Equivalency or Non-Equivalency projects. Additional information may be found in Appendix E.

**c. Bond/Loan Funding** (Equivalency or Non-Equivalency funds)

All entities listed on the IIPL, and the initial or amended PPL, that are invited to submit applications, are eligible for funding Equivalency or Non-Equivalency projects through the TWDB's purchase of the entity's bonds or through a loan agreement.

An origination fee of 1.85% is assessed at closing on the portion of a commitment that requires repayment. The origination fee does not apply to any principal forgiveness amounts. The financial assistance recipient has the option of financing the origination fee or paying this fee up front at closing.

**2. Emergency Relief Projects:**

The TWDB may consider Emergency Relief funding to replace or rehabilitate essential wastewater treatment facilities that pose an imminent peril to public health, safety, environment, or welfare and threat of failure in response to an emergency condition(s). Projects will be rated by the TWDB and added to the PPL as "Emergency Relief" projects. Emergency relief projects submitted after the March 2, 2015 project information form submission deadline may be invited in the first round of invitations for SFY 2016 funding. The Executive Administrator may bypass projects to provide funding to emergency relief projects. An emergency relief project may qualify and receive funding concurrently for disadvantaged communities and green subsidy, provided funding is available.

**3. Summary of Options:**

The following table provides a comparison of the different funding options.

Funding Option	Principal Forgiveness	Interest Rates		Origination Fee
		Equivalency	Non-Equivalency	
Disadvantaged Community	30%, 50%, or 70%	155 basis points below market *	N/A	1.85% **
Subsidized Green	15%	155 basis points below market *	120 basis points below market *	
Bonds/Loans	N/A	155 basis points below market *	120 basis points below market *	
* Based on a level debt service schedule				
** Not assessed on the principal forgiveness portion				

**Note:** An entity may receive Disadvantaged Community and Green principal forgiveness, concurrently with a bond or loan.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**I. Water Loss Mitigation**

If a retail public utility's total water loss meets or exceeds the threshold for that utility in accordance with §358.6 of Title 31, Part 10, Texas Administrative Code, the retail public utility must use a portion of any financial assistance received from the TWDB, including the CWSRF, to mitigate the utility's water loss. However, at the request of a retail public utility, the TWDB may waive this requirement if the TWDB finds that the utility is satisfactorily addressing the utility's system water loss. Mitigation, if necessary, will be in a manner determined by the retail public utility and the TWDB's Executive Administrator in conjunction with the project proposed by the utility and funded by TWDB.

**J. Terms of Financial Assistance**

Financing may be offered for a term of up to 30 years for the planning, acquisition, design, and/or construction phases according to TWDB determined guidelines and in accordance with the CWA. The term of financial assistance offered may not exceed the projected useful life of an eligible project.

**K. Commitment Timeframes for Projects with Principal Forgiveness Component(s)**

Due to the high demand and limited availability of subsidized funding, it is imperative that applicants offered these funds proceed in a timely manner. Therefore, the TWDB has established commitment timeframes for projects that qualify and have been designated to receive additional subsidization in the form of principal forgiveness. If an applicant does not proceed through the application process and obtain a funding commitment within the timeframes listed below, the additional subsidization may be re-allocated to another eligible project. The TWDB may grant an extension of time for obtaining a commitment if an applicant demonstrates sufficient reason for a delay.

<b>Principal Forgiveness Type</b>	<b>Commitment Deadline</b>
Disadvantaged Communities	4 months
Other Additional Subsidization, including Green Subsidy	4 months

**L. Closing Deadlines**

The deadline to close a commitment is dependent on whether the commitment includes additional subsidization in the form of principal forgiveness. All commitments that include principal forgiveness funding concurrently with bonds/loan funding must close within six months from the date of the commitment. All commitments for bonds/loan funding without any principal forgiveness funding must close within one year from the date of the commitment. For multi-year commitments described in the next section, the closing deadline for the initial year will follow the chart below. For each subsequent year, the commitment must close within the dates established by the TWDB at commitment. The Board may grant extensions of time to close if an applicant demonstrates sufficient reason for a delay.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Type of Financial Assistance	Closing Deadline
All commitments that include principal forgiveness and bonds/loan	6 months
All commitments for bonds/loan without any principal forgiveness	12 months

**M. Limits on Funding**

**1. Proportionate Share**

The TWDB may limit the amount of funding available to an individual entity based on a proportionate share of total funds available.

**2. Additional Project Funding Before Closing**

The total project costs may be increased if the entity shows that additional funds are necessary to implement the project. If the project includes additional subsidization the total amount of additional subsidization in the form of principal forgiveness allocated to the project may not increase from the amount listed in the adopted IUP unless additional subsidization funding is available.

**3. Cost Overruns After Closing**

In the event of cost overruns on projects funded from a previous commitment, additional funding may be considered on a case by case basis.

**N. Updates to the Intended Use Plan**

Substantive changes to the IUP will be made through an amendment after a 14-day public review and comment period. Non-substantive changes may be made by the TWDB without public notification.

**VIII. Multi-year Commitments**

In SFY 2016, the CWSRF will implement multi-year commitments to assist entities that need to fund large projects over a period of time. This new option will provide a reliable source of capital based on a commitment structure that meets the annual capital requirements of the project. Commitments may extend up to five years. To assist in providing for long-term financial planning, the interest rate reduction (e.g. 120 or 155 basis points) for the multi-year commitments will be established and locked for the five year period based on the interest rate reduction prescribed in the IUP for the first year's commitment.

This option is only available for projects that do not receive additional subsidization in the form of principal forgiveness based on the affordability criteria. However, the entity receiving a multi-year commitment may receive additional subsidization for the other eligible options, such as green subsidy, for the amount of funds committed for the initial year.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Any entity receiving a multi-year commitment will need to annually re-confirm their anticipated funding commitments established with the initial commitment.

**IX. Financial Status of the Clean Water State Revolving Fund**

The base amount of funding available for SFY 2016 is set at \$525,000,000. The amount of the FFY 2015 capitalization grant allotment for the CWSRF is \$63,756,000, with a match of \$12,751,200 to be provided by the state. The TWDB will comply with the requirements associated with the FFY 2015 allotment in SFY 2016.

**A. Administration**

The maximum annual amount of CWSRF money (not including any origination fees) that may be used to cover the reasonable costs of administering the fund is the greatest of the following:

1. an amount equal to 4 percent of all grant awards received by a State CWSRF less any amounts that have been used in previous years to cover administrative expenses;
2. \$400,000; or
3. 1/5 percent of the current valuation of the fund.

For SFY 2016, the TWDB will allocate funds for administrative costs based on a calculation that ensures that the allocated amount is not greater than 4 percent of all grant awards received by a State CWSRF less any amounts that have been used in previous years to cover administrative expenses. The amount for SFY 2016 administrative costs shown on the projected Sources and Uses of Funds (Appendix B) is equal to four percent of the FFY 2015 capitalization grant of \$63,756,000 or \$2,550,240. The annual and cumulative amounts used for administrative costs are reported in the CWSRF Annual Report.

**B. Sources of State Match**

The deposit of required state match will occur in advance or at the time of the scheduled grant payment and the source of funding for the match, which may include the proceeds from bond sales, varies based upon availability.

**C. Binding Commitment Requirement**

The TWDB has established a goal to enter into binding commitments during SFY 2016 that total 120% of the amount of the FFY 2015 grant that will be allocated to projects. A binding commitment occurs when the TWDB's Board adopts a resolution to commit funds to a project. To meet the binding commitment requirement, the initial round of projects invited to submit applications, which totals \$684,363,274, exceeds the amount of the capitalization grant and state match funds. After the initial invitation round, TWDB invites additional entities to submit applications on a first-come, first-served basis. If all of the grant funds are not committed or otherwise obligated; grant funds remaining after the SFY 2016 funding

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

cycle has ended will be rolled forward to the SFY 2017 IUP.

**D. Leveraging and Cross-collateralization**

The CWSRF is leveraged to provide funds over and above the capitalization grant and state match to assist public water systems meet their needs. As authorized by the Clean Water and Safe Drinking Water Acts and the Texas Water Code, the TWDB may use the assets of the CWSRF and the DWSRF as a source of revenue and security for the payment of the principal and interest on revenue bonds for the CWSRF and DWSRF. The authority to cross-collateralize the CWSRF and DWSRF enhances the ability of the DWSRF to leverage its funds and increase its lending capacity without harm to the CWSRF.

**E. Method of Cash Draw**

The method of cash draw for the FFY 2015 capitalization grant is to expend the required state match first, and then federal funds will be drawn at a rate of 100%.

**F. Long-Term Financial Health of the Fund**

The long-term financial health of the CWSRF is monitored through ongoing cash flow and capacity modeling. The TWDB lending rate policy has been established to preserve the corpus of the capitalization grants and state match funds, excluding the amount of principal forgiveness and administration from each grant. The TWDB will continue to manage the CWSRF to ensure funds will be available in perpetuity for activities under the CWA.

**G. Interest Rate Policy**

The TWDB has established an interest rate policy that provides for fixed rates. The program is designed to provide borrowers with a reduction from the market based on a level debt service payment schedule. For SFY 2016, Equivalency financial assistance will be offered at 155 basis points below the market rate and Non-Equivalency financial assistance will be offered at 120 basis points below the market rate, based on a level debt service schedule. Fixed rates are set five business days prior to the adoption of the political subdivision's bond ordinance or resolution or the execution of the financial assistance agreement and are in effect for forty-five days.

**H. Fees**

The only fee is an origination fee of 1.85% that is assessed at closing. Fees are not deposited into the CWSRF. The fees may be used for administrative costs, including project oversight, and long-term financial monitoring.

**I. EPA Program Evaluation Report (PER) and Audit**

EPA conducted an annual program review of the CWSRF for SFY 2014 through an onsite review occurring from March 30, 2015 to April 2, 2015. EPA is currently preparing the PER based on the annual review.

**Texas Water Development Board**  
**SFY 2016 Clean Water State Revolving Fund**  
**Intended Use Plan**

The Texas State Auditor's Office published the results of the SFY 2014 Single Audit of the CWSRF in February 2015. There were no findings as a result of the review.

**X. Navigating the Lists**

Appendices G – L are a series of lists that detail the proposed project information for each project based upon the PIFs received.

- **Appendix G** - The alphabetical list is the PPL sorted alphabetically. It contains the project information; the name of the applying entity, their total number of points and associated priority order rank, a detailed description of the proposed project, all project phases requested by the entity, the estimated construction start date, total project cost, the percentage of principal forgiveness if the project is eligible to receive disadvantaged funding, information regarding included green components, and a reference to any other related PIFs from the current or previous IUPs. A grand total for all of the projects is listed on the last page of the appendix.
- **Appendix H** – Lists projects that were deemed ineligible to receive CWSRF funding with a brief description as to why they were deemed ineligible.
- **Appendix I** – Lists projects that were deemed ineligible to receive disadvantaged funding with a brief description as to why they were deemed ineligible. The project may still be eligible to receive other funding options.
- **Appendix J** – Lists projects in order of highest priority to receive funding. The content is the same as the alphabetical list in Appendix G.
- **Appendix K** – Is the list of projects that will be invited in the initial invitation round. The information provided in this list is similar to the alphabetical and priority order lists. The TWDB has determined which project phases are eligible to receive funding during this SFY, which is depicted in the Phase(s) column. Projects on this list will receive an invitation letter from the TWDB upon Board approval of the IUP. Pertinent notes and the definitions of acronyms and footnotes are listed on the last page of the appendix along with a grand total for the projects.
- **Appendix L** - The Initial Invited Green Projects List is a subset of the IIPL of only projects with green components. The information detailed includes a description of the green components, the categories of those green components, the eligible phases of the project, the total project cost, the total of the green component costs, the type of green project, and whether the proposed project is eligible to receive subsidized green funding. A grand total for the projects is listed on the last page of the appendix along with any pertinent notes and the definitions of acronyms and footnotes.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**Appendix A: Public Review and Comment**

**Public Participation in the Development of the Intended Use Plan**

Public participation is an important and required component of the IUP development process. The TWDB takes seriously its responsibility in administering these funds and considers public input necessary and beneficial.

**A. Notice**

To seek public comment on the proposed uses of funds, the draft amended IUP, including the associated lists, was made available for a 30-day public comment period. The draft SFY 2016 CWSRF IUP, dated July 10, 2015, was announced as follows:

- Public notification of the draft IUP, the public comment period, and public hearing notice were posted on the TWDB website at [www.twdb.texas.gov](http://www.twdb.texas.gov).
- A notice of the public hearing was published in the *Texas Register*.
- A copy of the draft IUP was sent to EPA.

**B. Comment**

Comments were accepted via the following four options from July 10, 2015, until 5:00 P.M. on August 8, 2015.

1. Attending a public hearing that was held on July 29, 2015, at 10 A.M. in Room 170 of the Stephen F. Austin Building located at 1700 N. Congress Avenue in Austin, Texas
2. Submitting comments via the following online comment page:  
<https://www2.twdb.texas.gov/apps/iup/>
3. Emailing comments to the following electronic mail address:  
[iupcomments@twdb.texas.gov](mailto:iupcomments@twdb.texas.gov).

Please specify in the subject line "*CWSRF comments*".

4. Mailing comments to the following postal mail address:  
Ms. Jo Dawn Bomar, Director  
Program Administration and Reporting  
Texas Water Development Board  
P.O. Box 13231  
Austin, TX 78711-3231

In accordance with federal requirements, all comments were responded to on an individual basis and reported to the TWDB's Board at the time of their review of the IUP.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**C. Approval**

The SFY 2016 CWSRF IUP will be finalized once it is considered and approved by the TWDB's Board.

**D. Documentation**

After Board approval, the final approved IUP will be formally submitted to the EPA and posted on the TWDB website.

**Texas Water Development Board

Intended Use Plan**

**Appendix B. Projected Sources and Uses of Funds  
9/1/2015 to 8/31/2016  
(As of June 30, 2015)**

**SOURCES:**

FFY 2015 Federal Capitalization Grant	\$63,756,000
State Match - for FFY 2015 Federal Capitalization Grant	\$12,751,200
Undrawn previous grants (Administration)	\$4,051,930
Principal Repayments	\$91,286,800
Interest Repayments	\$65,710,012
Investment Earnings on Funds	\$263,875
Cash available	\$300,498,321
Additional net leveraging bond proceeds (based on "Projects to be Funded")	\$290,000,000

**TOTAL SOURCES:**

**\$828,318,138**

**USES:**

**Administration:**

Administration – 4% of amount of FFY 2015 Capitalization Grant	\$2,550,240
--	-------------

**Administration from prior grant – reallocate to construction funding:**

\$4,051,930

**Projects to be Funded:**

SFY 2016 IUP Commitments - Principal Forgiveness	\$19,126,800
SFY 2016 IUP Commitments – Bonds/Loans	\$505,873,200
Total Projects To Be Funded - SFY 2016:	\$525,000,000

**Projects Already Pledged**

Commitments	\$154,253,805
Applications	\$32,775,400
Total Projects Already Pledged or being processed:	\$187,029,205

**Debt Service (Principal and Interest) on:**

Revenue Bonds - to Leverage the Fund:	
Subordinate - Fixed Rate	\$93,448,688
Match General Obligation Bonds	\$16,238,075
Total Debt Service:	\$109,686,763

**TOTAL SOURCES:**

**\$828,318,138**

**NET SOURCES (USES)**

**\$0**

Fees are not deposited into the Fund; therefore, based on EPA guidance they are not included in the Sources and Uses for the Fund

Intended Use Plan**

**Appendix C. Rating Criteria**

**Publicly Owned Treatment Works (Sec. 212) Rating Criteria**

- 30 pts. – Enforcement action (court, EPA, or TCEQ order) imposes a schedule.
- 20 pts. – Enforcement action: Participation in TCEQ's SSO Initiative
- 11 pts. – Unserved area of an existing developed community is extended service.
- 30 pts. – Unserved area to be served has a nuisance documented by letter from the TCEQ or a Designated Agent licensed by the TCEQ. If the project is in an Economically Distressed Areas Program county, the letter may come from the State Health Department or a registered sanitarian.
- 10 pts. – Water body impacted by project is listed in a Watershed Protection Plan approved by the EPA.
- 5 pts. – Water body impacted by project is listed in a Watershed Protection Plan that is under development.
- 15 pts. – Innovative or alternative types of collection or treatment are proposed.
- 30 pts. – More stringent permit limits are to be met, or  
Conversion to a no-discharge or partial reuses facility to avoid higher level of treatment.
- 10 pts. – Regional project removes or prevents plant outfalls, or  
Regional project results in delivery of flow to, or receipt of flow at, a regional facility, thereby avoiding construction of a separate WWTP facility.

For projects that involve a facility that requires expansion of its hydraulic capacity or removal of extraneous flow, use EPA self-reporting data to determine the percentage of permitted capacity.

For existing plants permitted for $\geq 1$ MGD, use the past 12 months of reported data.	$(12 \text{ months ADF})(100) / (\text{permitted ADF}) = \text{_____}\%$
For existing plants permitted for $< 1$ MGD, use the highest 3-consecutive-month average of the past 12 months of reported data.	$(\text{max 3 months ADF})(100) / (\text{permitted ADF}) = \text{_____}\%$

ADF =Average Daily Flow

MGD =Million Gallons per Day

**Choose ONE of the considerations below, whichever results in the largest number of points.**

- 30 pts. – Capacity  $\geq 90\%$  and project directly or indirectly improves a capacity problem.
- 20 pts. – Capacity  $\geq 75\%$  and  $< 90\%$ , and project directly or indirectly improves a capacity problem.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

- 15 pts. – Capacity  $\geq$  65% and  $<$  75%, and project directly or indirectly improves a capacity problem.
- 15 pts. – Expansion of existing plant permitted for no-discharge where self-reporting flow data is not required.

If the project impacts a water body by directly or indirectly mitigating a problem identified in the latest approved State of Texas Watershed Action Planning Strategy Table (WAP), choose the applicable score according to the category indicated on the List. Projects impacting water bodies in a priority area will be awarded additional points.

Priority Area*	Non-Priority Area	WAP Category
50 pts.	40 pts.	TMDL study has been completed and approved by the EPA (4a).
40 pts.	30 pts.	A Total Maximum Daily Loads (TMDL) study is underway, scheduled, or will be scheduled (5a).
30 pts.	20 pts.	A review of the water quality standards for this water body will be conducted before a TMDL is scheduled (5b).
20 pts.	10 pts.	Additional data and information will be collected before a TMDL is scheduled (5c).

- 5 pts. – Whether a majority of the funds being requested from the CWSRF for the project be used to implement measures to reduce the demand for publically owned treatment works capacity through water conservation, efficiency, or reuse.
- 5 pts. – If the Applicant is a qualified nonprofit entity that has federal tax-exempt status, whether will a majority of the funds being requested from the SRF for the project be used to implement assistance to owners and operators of small and medium publically owned treatment works to either (a) plan, develop, and obtain financing for eligible CWSRF projects, including planning, design, and associated preconstruction activities; or (b) assist such treatment works in achieving compliance with the Act.

**Nonpoint Source Pollution (Sec. 319) Rating Criteria**

- 30 pts. – Area to be served has a nuisance documented by letter.
- 20 pts. – Aquifer or groundwater impacted by project is threatened.
- 10 pts. – Water body impacted by project is listed in a Watershed Protection Plan approved by the EPA.
- 5 pts. – Water body impacted by project is listed in a Watershed Protection Plan that is under development.

If the project impacts a water body by directly or indirectly mitigating a problem identified in the latest approved State of Texas Watershed Action Planning Strategy

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Table (WAP), choose the applicable score according to the category indicated on the List. Projects impacting water bodies in a priority area will be awarded additional points.

Priority Area*	Non-Priority Area	WAP Category
50 pts.	40 pts.	TMDL study has been completed and approved by the EPA (4a).
40 pts.	30 pts.	A TMDL study is underway, scheduled, or will be scheduled (5a).
30 pts.	20 pts.	A review of the water quality standards for this water body will be conducted before a TMDL is scheduled (5b).
20 pts.	10 pts.	Additional data and information will be collected before a TMDL is scheduled (5c).

- 30 pts. – The project includes stream bank restoration or contain elements of Low Impact Development, such as vegetated filter strips, bio-retention, rain gardens, or porous pavement

**Estuary Management (Sec. 320) Rating Criteria**

- 20 pts. – Project restores, protects, and enhances coastal natural resources.
- 20 pts. – Project improves water quality.
- 20 pts. – Project enhances public access.
- 20 pts. – Project improves onshore infrastructure and environmental management.
- 20 pts. – Project mitigates erosion and stabilizes shorelines.
- 20 pts. – Project educates the public on the importance of coastal natural resources.

**For all eligible projects:**

- 15 pts. – Whether a majority of the funds being requested from the SRF for the project be used to implement innovative approaches to manage, reduce, treat, or recapture stormwater or subsurface drainage water.
- 5 pts. – Whether a majority of the funds being requested from the SRF for the project be used to implement reuse or recycling wastewater, stormwater, or subsurface drainage water.

**Effective Management Rating Criteria**

- 5 pts. – Entity has adopted an asset management plan within the past 5 years that incorporates an inventory of all assets, an assessment of the criticality and condition of the assets, a prioritization of capital projects needed, and a budget

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

- 1 pt. – Entity is planning to prepare an asset management plan as part of the proposed project.
- 1 pt. – Asset management training has been administered to the entity's governing body and employees.
- 1 pt. – Proposed project addresses a specific goal in a water conservation plan.
- 1 pt. – Proposed project addresses a specific goal in an energy assessment, audit, or optimization study conducted within the past three years.
- 2 pts. – Project is consistent with a state or regional water plan, integrated water resource management plan, regional facility plan, regionalization or consolidation plan, or a TMDL implementation plan.

**Affordability - Disadvantaged Eligibility**

- 10 pts. – Entity qualifies as a disadvantaged community.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**Appendix D. Affordability Criteria to Determine Disadvantaged Community Eligibility**

A disadvantaged community is a community that meets the CWSRF's affordability criteria based on income, unemployment rates, and population trends. An eligible disadvantaged community consists of all of the following:

1. The service area of an eligible applicant, the service area of a community that is located outside the entity's service area, or a portion within the entity's service area if the proposed project is providing new service to existing residents in unserved areas; and
2. meets the following affordability criteria:
  - (a) Has an annual median household income (AMHI) that is no more than 75% of the state median household income using an acceptable source of socioeconomic data, and
  - (b) the Household Cost Factor that considers income, unemployment rates, and population trends must be greater than or equal to 1% if only water or sewer service is provided or greater than or equal to 2% if both water and sewer service are provided.

**Acceptable Source of Socioeconomic Data for SFY 2016**

For SFY 2016, the TWDB will utilize:

- (1) U.S. Census 2009-2013 American Community Survey (ACS) 5-year estimates, along with the 2006-2010 American Community Survey (ACS) 5-year estimates for determining whether there was a decline in population, or
- (2) Data from a survey approved by the Executive Administrator of a statistically acceptable sampling of customers in the service area completed in accordance with the most current Socioeconomic Surveys Guidelines (WRD-285) posted on the TWDB website. An entity must submit documentation that substantiates the inadequate or absent Census data that led to the need to conduct a survey. All entities must obtain prior approval to use survey data instead of the most recently available American Community Survey data.

**Affordability Calculation and Disadvantaged Community Eligibility**

**Step 1. Comparison to State annual median household income.** The annual median household income (AMHI) for the project service area (either entire or portion) must be 75% or less than the state's AMHI using an acceptable source of socioeconomic data for SFY 2016.

**Step 2. Determining the Household Cost Factor**

The total Household Cost Factor (HCF) is comprised of a household cost factor based on the annual median household income, plus an additional household cost factor based on unemployment rates (if the unemployment rate for the service area is greater than the state average) plus an additional household cost factor based on population decline (if there has been a decline in the population of the service area over a period of time). The total HCF used in the affordability criteria takes into consideration the potential burden that the cost of a proposed project will place on a household. The entity's total HCF, which consists of the Income HCF (the percentage of annual household income that goes toward water, sewer, fees/surcharges, and

**Texas Water Development Board**  
**SFY 2016 Clean Water State Revolving Fund**  
**Intended Use Plan**

project financing costs) combined with the Unemployment Rate HCF (not to exceed 0.75%) and the Population Decline HCF (not to exceed 0.5%), must be:

- 1.0% or greater if the entity currently offers either water or sewer service, or
- 2.0% or greater if the entity currently offers both water and sewer service.

The Unemployment Rate HCF and Population Decline HCF can only increase the total HCF, not decrease it.

### Step 3. Principal Forgiveness Eligibility and Levels

The eligible level of principal forgiveness for a project is based on the difference between the calculated total HCF under Step 2 and the minimum HCF of 1% (if only water or sewer service is provided) and 2% (if both water and sewer services are provided) as shown in the chart below:

Household Cost Factor Difference	Principal Forgiveness as a % of estimated CWSRF-funded project
≥ 0% and < 1.5%	30%
≥ 1.5% and < 3%	50%
≥ 3%	70%

Individual projects will be reviewed for disadvantaged community eligibility as stand-alone projects. However, if an entity submits an application covering multiple PIFs or multiple applications for multiple PIFs within the State Fiscal Year prior to any receiving a funding commitment, the disadvantaged community eligibility may be re-evaluated based on the combined costs of all the projects.

In instances where the ACS data does not adequately reflect an entity's service area (e.g. an entity serves a community outside of its CCN, an entity serves another system, the entity is a system without a Census Bureau defined boundary, etc.), a prorated analysis of ACS block group data will be performed to calculate the AMHI. An example of this method follows:

			From Entity	Calculation	ACS 2009-2013	Calculation	ACS 2009-2013	Calculation	Calculation
County	Census Tract	Block Group	Total Number of Household Connections	% of TTL Connections	AMHI	Prorated AMHI	Average HH Size	Prorated Average HH Size	Entity's Population Served
La Salle	9503	3	247	23.66%	\$22,031	\$5,212	4.23	1.00	247
La Salle	9503	4	315	30.17%	\$25,313	\$7,638	4.26	1.29	405
La Salle	9503	5	482	46.17%	\$27,115	\$12,519	2.81	1.30	625
			1,044	100%		\$25,368		3.58	1,277

			ACS 2009-2013	Calculation	ACS 2009-2013	ACS 2006-2010	Calculation
County	Census Tract	Block Group	Unemployment Rate	Prorated Unemployment Rate	Prorata Population 2013	Prorata Population 2010	Prorata Pop. Change
La Salle	9503	3	14.23%	3.37%	993	885	108
La Salle	9503	4	25.46%	7.68%	1,315	1,173	142
La Salle	9503	5	4.99%	2.30%	1,423	1,634	-211
				13.35%	3,731	3,692	39

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

For entities that serve retail customers with differing rate structures, prorated rates are used, in some instances, to calculate each entity's household cost factor in SFY 2016. The following tables are an example of the method used. The TWDB will require use of prorated rates to determine an entity's water and/or sewer bills when applicable.

**Prorated Average Monthly Water Bill**

	A Number of Household Connections (HH)	B Percentage of Total HH	C Average Monthly Water Flow	D Average Household Size	E Average Mo. Water Flow / HH (CxD)	F First Tier	G Initial Rate	H Additional Use	I Additional Rate	J Other Changes	K Average Mo. Water Bill (((E- F)/H)xI)+G	L Prorated Mo. Water Bill (BxK)
Entity A	1,823	33.95%	2,325	2.56	5,952	2,000	\$ 14.45	1,000	\$ 6.70	\$ 2.00	\$ 42.93	\$ 14.58
Entity B	1,135	21.14%	2,325	2.47	5,743	3,000	\$ 23.41	100	\$ 0.57	\$ -	\$ 39.04	\$ 8.25
Entity C	1,836	34.20%	2,325	2.78	6,464	3,000	\$ 29.85	1,000	\$ 6.81	\$ -	\$ 53.44	\$ 18.27
Entity D	575	10.71%	2,325	2.53	5,882	1,500	\$ 16.00	1,000	\$ 4.00	\$ -	\$ 33.53	\$ 3.59
<b>Totals</b>	<b>5,369</b>	<b>100.00%</b>							<b>Average Monthly Water Bill</b>			<b>\$ 44.69</b>

**Prorated Average Monthly Sewer Bill**

	A Number of Household Connections (HH)	B Percentage of Total HH	C Average Monthly Water Flow	D Average Household Size	E Average Mo. Water Flow / HH (CxD)	F First Tier	G Initial Rate	H Additional Use	I Additional Rate	J Other Changes	K Average Mo. Water Bill (((E- F)/H)xI)+G	L Prorated Mo. Water Bill (BxK)
Entity A	1,823	33.95%	1,279	2.56	3,274	3,000	\$ 10.95	1,000	\$ 2.25	\$ 2.00	\$ 13.57	\$ 4.61
Entity B	1,135	21.14%	1,279	2.47	3,159	3,000	\$ 17.00	100	\$ 0.83	\$ -	\$ 18.32	\$ 3.87
Entity C	1,836	34.20%	1,279	2.78	3,556	-	\$ 20.79	1	\$ -	\$ -	\$ 20.79	\$ 7.11
Entity D	575	10.71%	1,279	2.53	3,236	1,500	\$ 10.00	1,000	\$ 2.00	\$ -	\$ 13.47	\$ 1.44
<b>Totals</b>	<b>5,369</b>	<b>100.00%</b>							<b>Average Monthly Sewer Bill</b>			<b>\$ 17.03</b>

If an entity is requesting disadvantaged community status for a portion of its service area, the combined household cost factor is calculated in the same manner as described above with the exception that the annual project financing cost per customer is calculated using the total household service connections in the full service area (not the portion).

If taxes, surcharges, or other fees are used to subsidize the water and/or sewer system, the average annual amount per household may be included in calculating the household cost factor or the combined household cost factor.

Systems owned and operated by a public school or school district will be evaluated for their annual median household income for their school district boundary. Since school districts typically do not have individual user costs, a household cost factor calculation cannot be performed. Therefore, districts with an AMHI less than or equal to 75% of the state's AMHI will automatically receive Disadvantaged Community status with the lowest available level of principal forgiveness.

If recent reliable data is unavailable for the school district to determine the AMHI, the TWDB will use information from the Texas Education Agency's Title I, Part A program to determine income eligibility. If more than 50% of the school districts campuses are eligible for the program, the district's AMHI will be assumed to be less than or equal to 75% of the State's AMHI.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

This page has been intentionally left blank.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**Appendix E. Federal Requirements and Assurances**

**A. Federal Requirements**

**1. Davis-Bacon Act**

The TWDB and all CWSRF financial assistance recipients will comply with the requirements of 40 CFR Part 31, the Davis-Bacon Act, and the U.S. Department of Labor's implementing regulations. The Department of Labor provides all pertinent information related to compliance with labor standards, including prevailing wage rates and instructions for reporting. WRRDA made the requirements of section 513 of the Federal Water Pollution Control Act (33 U.S.C. 1372) permanently applicable to the construction of treatment works carried out in whole or in part with CWSRF assistance. All contracts and subcontracts for any construction project carried out with CWSRF assistance shall insert, in full, in any contract in excess of \$2,000 the contract clauses of the document "*Texas Water Development Board Supplemental Contract Conditions and Instructions*" located at: <http://www.twdb.texas.gov/financial/instructions/doc/TWDB-0550.pdf>.

**2. American Iron and Steel (AIS)**

All of the iron and steel products used the construction, alteration, maintenance, or repair of treatment works funded by the CWSRF must be produced in the United States as provided in Section 608 of the Federal Water Pollution Control Act (33 U.S.C. 1388).

The term "iron and steel products" means the following products made primarily of iron or steel:

- lined or unlined pipes and fittings
- manhole covers and other municipal castings
- hydrants
- tanks
- flanges, pipe clamps and restraints
- valves
- structural steel
- reinforced precast concrete
- construction materials

EPA may waive the AIS requirement under certain circumstances.

The following are exempt from the AIS requirements:

(a) Financial assistance agreements closed before January 17, 2014;

(b) Financial assistance agreements closed on January 17, 2014 through September 30, 2014 where the Plans and Specifications were submitted to the TWDB prior to or on January 17, 2014 and approved by TWDB between January 17, 2014 and April 15, 2014;

(c) Financial assistance agreements closed on or after October 1, 2014 and the Plans and Specifications were approved by TWDB prior to June 10, 2014.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

Furthermore, if the original financial assistance agreement for the planning and/or design of a project closed prior to January 17, 2014, then the AIS provision would not apply to the construction phase of the same project. Additional guidance and information is available at [http://water.epa.gov/grants\\_funding/aisrequirement.cfm](http://water.epa.gov/grants_funding/aisrequirement.cfm)

**3. National Environmental Policy Act-like environmental review**

The National Environmental Policy Act provisions apply to all CWSRF assistance for the construction of treatment works. These requirements are specified in Texas Administrative Code, Title 31, Part 10, Chapter 375.

**4. Generally Accepted Accounting Principles**

Assistance recipients must maintain project accounts according to Generally Accepted Accounting Principles as issued by the Governmental Accounting Standards Board, including standards relating to the reporting of infrastructure assets.

**5. Cost and Effectiveness Analysis**

A municipality or intermunicipal, interstate, or State agency that receives assistance from the CWSRF must certify that they have conducted a cost and effectiveness analysis. A cost and effectiveness analysis is an eligible cost under the CWSRF. The certification must be provided before CWSRF assistance is provided for final design or construction.

**6. Architectural and Engineering contracts**

For equivalency projects only, a contract to be carried out using CWSRF funds for program management, construction management, feasibility studies, preliminary engineering, design, engineering, surveying, mapping, or architectural related services must be negotiated in the same manner as a contract for architectural and engineering services is negotiated under 40 U.S.C. 1101 et seq. This applies to new solicitations, significant contractual amendments, and contract renewals.

**7. Fiscal Sustainability Plan**

A recipient of a loan for a project that involves the repair, replacement, or expansion of a publicly owned treatment works must develop and implement a fiscal sustainability plan or certify that it has already developed and implemented a fiscal sustainability plan. This applies to a recipient of a loan only and does **not apply** to financial assistance involving the TWDB's purchase of the recipient's bonds.

**8. Compliance with Cross-cutting Authorities**

There are a number of federal laws, executive orders, and federal policies that apply to projects and activities receiving federal financial assistance, regardless of whether the federal laws authorizing the assistance make them applicable. These federal authorities are referred to as cross-cutting authorities or cross-cutters. The cross-cutters apply to

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

all **Equivalency** projects and activities assisted with CWSRF funds.

The cross-cutters can be divided into three groups: environmental; social policies; and, economic and miscellaneous authorities.

- Environmental cross-cutters include federal laws and executive orders that relate to preservation of historical and archaeological sites, endangered species, wetlands, agricultural land, etc. This cross-cutter requirement includes the National Environmental Policy Act (NEPA) compliant environmental review. For Equivalency projects, when conducting the NEPA-like review the TWDB will inform EPA when consultation or coordination by EPA with other federal agencies is necessary to resolve issues regarding compliance with applicable federal authorities.
- Social policy cross-cutters include requirements such as minority and women's business enterprise participation goals, equal opportunity employment goals, and nondiscrimination laws. This cross-cutter requirement includes compliance with the EPA's Disadvantaged Business Enterprise program administered by TWDB.
- Economic cross-cutters directly regulate the expenditure of federal funds such as the prohibition against entering into contracts with debarred or suspended firms.

A complete list of cross-cutting guidelines is located at:

[www.epa.gov/safewater/dwsrf/xcuts.html](http://www.epa.gov/safewater/dwsrf/xcuts.html)

## **9. Additional Subsidization**

In accordance with Section 603(i) of the CWA (33 U.S.C. 1383(i)), the TWDB may provide up to \$19,126,800 of additional subsidization for SFY 2016. A CWSRF may only provide additional subsidization to a municipality or intermunicipal, interstate, or State agency. The TWDB has allocated the additional subsidization as follows:

<b>Funding Option</b>	<b>Additional Subsidization Allocation</b>
Disadvantaged Community	\$14,345,100
Other Purposes (including Subsidized Green)	\$4,781,700
<b>Total</b>	<b>\$19,126,800</b>

## **10. Green Project Reserve**

A minimum of 10% of the capitalization grant, or \$6,375,600, will be allocated as the green project reserve as required by federal appropriations. It must be used for green component costs associated with eligible CWSRF projects. The amount of funds allocated to Green Project Reserve is defined in the Availability of Funds section.

To encourage green infrastructure projects, a portion of the additional subsidization will be made available for projects that include water efficiency, energy efficiency, to mitigate

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

stormwater runoff, and to encourage sustainable project planning, design, and construction. In order to be eligible to receive green subsidy, these projects eligible for additional subsidization must have approved green project elements with costs that exceed 30% of the total project costs.

Green components include green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities. Eligibility for all green projects will be determined by the TWDB. In the event the TWDB does not receive enough completed applications to meet the 10% for GPR projects, the Executive Administrator may bypass higher ranked projects to invite projects with eligible green component costs.

Projects which do not meet criteria of categorically eligible are required to produce a business case document. A business case demonstrates that proposed green component benefits have been thoroughly researched and documented. The TWDB utilizes the green project information worksheet (TWDB-0162) as a standard template for business cases. For information on the TWDB's GPR and recently closed business cases, visit <http://www.twdb.texas.gov/financial/programs/green/>.

Appendix L, "Initial Invited Green Projects", lists invited green projects with project descriptions that detail the green category associated with the project, whether the project is categorically eligible or may require a business case, and how much of the project's total cost is applicable to the GPR.

Information on green project eligibility may be found online at <http://www.twdb.texas.gov/financial/instructions/doc/TWDB-0162.docm>.

## **11. Signage**

Equivalency projects must comply with the EPA signage requirements implemented to enhance public awareness of CWSRF projects. The entity may select from the following options to meet EPA's signage requirement:

- Standard signage
- Posters or wall signage in a public building or location
- Newspaper or periodical advertisement for project construction, groundbreaking ceremony, or operation of the new or improved facility
- Online signage placed on community website or social media outlet
- Press release

According to EPA's policy, to increase public awareness of projects serving communities where English is not the predominant language, entities are encouraged to translate the language used (excluding the EPA logo or seal) into the appropriate non-English language.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**B. Assurances**

**1. Regulatory Assurances** (Citations refer to sections of Title VI of the Clean Water Act (CWA-33 U.S.C. §§1251 *et seq.*):

- a. 602(b)(2) – State Matching Funds - The TWDB agrees to deposit into the CWSRF from state monies an amount equal to 20% of the FFY 2015 federal capitalization grant on or before the date on which each quarterly grant payment is made to the TWDB.
- b. 602(b)(3) – Binding Commitments - The TWDB will enter into binding commitments for 120% of each quarterly payment within one year of receipt of that payment.
- c. 602(b)(4) – Expeditious and Timely Expenditures - The TWDB will expend all funds in the CWSRF in a timely and expeditious manner.
- d. 602(b)(5) – First Use for Enforceable Requirements - The TWDB has previously met this requirement.
- e. 602(b)(6) – Compliance with Title II Requirements - The TWDB will comply with 511(c)(1) and 513 of this Act in the same manner as treatment works constructed with assistance under title II of this Act.
- f. 602(b)(6) – Environmental Reviews –A NEPA-like review will be conducted on all projects for the construction of treatment works.

**2. Entry into the Federal Reporting Systems**

The TWDB will enter information into EPA's Clean Water Benefits Reporting System, the CWSRF National Information Management System, and the Federal Funding Accountability and Transparency Act Subaward Reporting System (FSRS) as required. A single set of projects up to the amount of the capitalization grant that will comply with all federal equivalency requirements will be entered in FSRS.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

This page has been intentionally left blank.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**Appendix F. Bypass Procedures**

The Executive Administrator may decide to bypass, or skip, higher ranked projects in favor of lower ranked projects to ensure that funds available are utilized in a timely manner and that statutory and capitalization grant requirements are met. If an entity is offered funding for any project that has an interrelated project ranked lower on the list, the TWDB Executive Administrator will have discretion to also offer funding for the interrelated project.

Reasons for bypassing projects are listed below, but are not limited to:

**1. Projects Previously Funded**

To fund projects that received funding for planning, acquisition and/or design during SFY 2013, 2014, or 2015 and were automatically added to the SFY 2016 PPL and IIPL for construction phase funding.

**2. Disadvantaged Communities**

In the event that there are not enough projects with completed applications eligible to receive Disadvantaged Community funding, the Executive Administrator may bypass other projects to invite additional projects that are eligible for additional subsidization.

**3. Green Project Reserve**

In the event that there are not enough projects with completed applications eligible to meet the green project reserve goal, the Executive Administrator may bypass other projects to invite additional projects that are eligible for review of their green components and possible funding.

**4. Small Communities**

A minimum of 15% of the capitalization grant will be made available to systems serving populations less than 10,000. In the event that small community projects with completed applications do not equal 15% of the capitalization grant, the Executive Administrator may bypass other projects to include additional small community projects.

**5. Emergency Relief**

The Executive Administrator may bypass projects to provide Emergency Relief funding to replace or rehabilitate essential wastewater treatment facilities that pose an imminent peril to public health, safety, environment, or welfare and threat of failure in response to an emergency condition(s). Projects will be rated by the TWDB and added to the PPL as an "Emergency Relief" project.

**Texas Water Development Board  
SFY 2016 Clean Water State Revolving Fund  
Intended Use Plan**

**6. Readiness to Proceed**

The Executive Administrator may bypass projects to include those deemed ready to proceed to construction.

**7. Past Project Performance**

If the applicant has failed to close a commitment or complete a project in a timely manner under a prior IUP, and it is determined that such failure to perform could jeopardize the timely use of funds for a project under this IUP, the Executive Administrator may bypass the project.

**8. Financial Capacity**

A project may be bypassed if the Executive Administrator determines that the applicant will be unable to repay the SRF financial assistance for the project.

<b>POTW</b>													
11	81	11083	Arlington	TX0022802	369,308	The City of Arlington is seeking funding to continue with the replacement of their deteriorated collection system. The City is under enforcement for sanitary sewer overflows. In 2007, the City entered into agreement with Texas Commission on Environmental Quality (TCEQ) to address sanitary sewer overflows. The proposed projects are part of the City's plan to address the TCEQ enforcement agreement.	IIIB	C	\$2,398,000.00		Yes-BC	\$2,398,000.00	
145	15	11188	Baird	TX0053384	1,673	City wishes to replace existing mechanical WWTP with a new facultative lagoon and pond system. The City is proposing to replace an existing mechanical WWTP with a new facultative lagoon and pond treatment system, with disposal of effluent via irrigation.	I	PD	\$410,000.00				
194	0	11189	Baird	TX0053384	1,673	The City needs to replace 50 year old clay sewer lines to address excess infiltration/inflow and add manholes. The City is proposing to replace approximately 19,500 feet of 6 and 8-inch clay sewer lines to address infiltration/inflow. The City will add approximately 30 manholes to the line as it is replaced where none exist now.	IIIA	PD	\$320,000.00				
168	10	11190	Bangs	TX0053511	1,518	The City of Bangs is proposing to add a secondary clarifier at their wastewater treatment plant for system reliability. The City is seeking planning and design funding to add a secondary clarifier at their wastewater treatment plant for system reliability.	I	PD	\$200,000.00	30%			
39	61	11084	Bartlett	TX0027006	1,980	The City of Bartlett needs to address old deteriorated sanitary and storm sewer collection system to address infiltration/inflow into the sanitary sewers. The City also needs to address aging lift stations that need to be replaced or rehabilitated. The City also needs to remove accumulated sludge from one of their existing treatment ponds to address Texas Commission on Environmental Quality treatment violations. The City proposes to replace deteriorated vitrified clay sanitary sewer piping and deteriorated storm water piping within the city to address inflow/infiltration. The City is proposing to replace one existing lift station with a gravity flow system and rehabilitate an additional lift station. The City is proposing to remove accumulated sludge from one existing treatment pond.	IIIB	PDC	\$8,000,000.00	50%	Yes-BC	\$5,744,000.00

<b>POTW</b>													
191	0	11191	Bastrop Co WCID # 2		1,435	The District needs to purchase the collection system servicing their customers from LCRA. The District will purchase the collection system from LCRA. Treatment will continue to be provided by the City of Bastrop.		A	\$4,000,000.00				
24	70	11192	Bevil Oaks	TX0054551	1,274	The City needs to replace or complete major rehabilitation on their existing 33-year old WWTP. The City is proposing to study alternatives and either replace/rehab their existing plant or enter into agreement with the City of Beaumont to accept and treat the sewage.	I,II	PDC	\$2,352,415.00				
106	30	11193	Blanket	TX0127922	508	The City's WWTP is no longer working effectively. The existing mechanical WWTP will be abandoned and a new WWTP with a facultative lagoon, stabilization ponds, and irrigation holding pond will be constructed. The lift station will be modified to pump wastewater to the new WWTP. The new system will be able to irrigate approximately 12 acres with a new center pivot irrigation system.	I	PAD	\$325,000.00				
41	61	11142	Bonham	TX0021814	10,127	The City of Bonham needs to upgrade/rehabilitate several components of their existing wastewater treatment facility to address Texas Commission on Environmental Quality (TCEQ) enforcement orders. The City is proposing to make upgrade/rehabilitate their existing wastewater treatment facility in three phases. Phase I will address immediate needs at the plant headworks; Phase II will include upgrade/rehabilitation of the Sequencing Batch Reactor units, aerobic digesters, filters, and clarification systems; Phase III will include tertiary filtration, phosphorous remove capabilities, controls, electrical, and an emergency generator.	II	PDC	\$3,564,000.00	30%	Yes-BC	\$1,250,000.00	
184	5	11143	Bovina		1,868	The City of Bovina needs to construct improvements to the piping at the lagoon treatment facility and to the pumping facilities for the effluent disposal by irrigation. The City is proposing to reconstruct both the influent and effluent lines at the wastewater treatment facility and add additional lagoon liners to comply with their permit.	I	DC	\$2,377,000.00

<b>POTW</b>													
33	65	11131	Brady	TX0034312	5,541	The City of Brady urgently needs to replace the city's existing 1.0 million gallon per day wastewater treatment facility, originally constructed in 1963. The City needs to address the dewatering of the sludge produced as an emergency situation. The City is proposing to replace/rehabilitate several gravity flow sewer lines that are in danger of failure due to age. The City in proposing to construct an entirely new wastewater treatment facility to replace their over 50-year old facility. The new facility will be capable of meeting new, stricter permit limits and will be located out of flood danger. The existing sewer lines will be replaced/rehabilitated to provide continued service to the citizens of the City.	II,I	C	\$23,480,000.00	30%	Yes-BC	\$500,000.00	
138	20	11194	Brady	TX0034312	4,320	City needs to address inflow/infiltration throughout the system. The City proposes to replace sewer lines that are know to cause significant inflow/infiltration.	IIIA	PDC	\$417,000.00				
9	82	11169	Brazoria Co FWSD # 2	TX0072591	375	Brazoria CountyFWSD #2, on behalf of the Demi John community, is seeking funding to complete a first time wastewater collection system to replace failing on-site sanitary sewage treatment systems. The District has completed planning and design for the first time collection system. Treatment will be provided by the City of Oyster Creek, approximately 12 miles away. The District has received USDA RD funding, but is anticipating a shortage of funds to complete the project. The District is requesting additional funds through the CWSRF program to complete the project.	VII	C	\$850,000.00		Yes-BC	\$850,000.00	
57	55	11200	Brownsville	TX0055484	202,865	The Brownsville Public Utilities Board (BPUB)needs to replace/rehabilitate old, deteriorated sanitary sewer collection system components to address sanitary sewer overflows. The board proposes to replace approximately 61,250 feet of deteriorated wastewater collection system piping, and upgrade/replace approximately 26 lift stations to address sanitary sewer overflows.	IIIA	PDC	\$40,479,009.00		Yes-BC	\$1,335,807.00	
127	25	11196	Brownsville	TX0071340	202,865	The BPUB is proposing to construct a reuse system for the effluent from the Robindale WWTP. The BPUB is proposing to develop a reuse system to deliver 5 to 6 million gallons per day of effluent from the Robindale WWTP to areas on the north side of Brownsville.	X	PDC	\$20,389,480.00		Yes-BC	\$2,222,045.00

34	65	11268	San Antonio Water System	TX0077801	1,552,024	The City is experiencing sanitary sewer overflows along the 24 to 36-inch pipeline that needs to be replaced. The City is under an EPA agreed order to make improvements in their system. The City is proposing to replace approximately 3 miles of 24 to 36-inch pipeline to increase capacity to prevent sanitary sewer overflows.	IIIB	D	\$2,015,000.00				
35	65	11270	San Antonio Water System	TX0077801	1,552,024	San Antonio Water System (SAWS) needs to continue with rehabilitation of their sanitary sewer collection system as agreed to under a U. S. EPA decreed order issued in 2013. SAWS is proposing to rehabilitate approximately 45 miles of various diameter sanitary sewer lines and manholes in response to an U.S. EPA decreed order.	IIIB	C	\$28,895,000.00				
202	0	11274	San Antonio Water System	TX0077801	1,517,000	The project area is identified as having capacity constraints and has experienced multiple reported sanitary sewer overflows since 2003. The wastewater hydraulic model also predicts overflows to occur in this area given the estimated flows and current infrastructure. In addition to capacity, some of the infrastructure in this area requires rehabilitation due to existing conditions. The project consists of a total of approximately 23,000 linear feet of 21-inch and 24-inch wastewater mains.	IIIB	D	\$1,484,512.00				
203	0	11276	San Antonio Water System	TX0077801	1,517,000	The existing sewer mains are in poor condition due to deterioration and currently lack sufficient capacity to withstand future flows due to growth and during peak storm events. Additionally, this project is located in a heavily congested area of downtown San Antonio making construction very difficult. Replacement of approximately 7,500 linear feet of existing 60-inch gravity sewer mains along North Alamo Street from Josephine Street to Elm Street.	IIIB	C	\$11,538,700.00				
204	0	11277	San Antonio Water System	TX0077801	1,517,000	Project includes rehabilitation and construction. The "E-16-Wurzbach-Blanco to Nakoma" project consists of a total of approximately 19,000 linear feet of 8-inch, 12-inch, 15-inch, 18-inch, 21-inch, 27-inch, 30-inch, and 36-inch wastewater mains. The project will construct a 36-inch, 30-inch, 27-inch, 21-inch, 18-inch, and 15-inch gravity main the Eastern Basin along Salado Creek between Jones Maltsberger Road and Blanco Road; and a 12-inch and 18-inch gravity main along Rhapsody between Highway 281 and W. Silversands.		D	\$1,567,648.00

<b>POTW</b>													
205	0	11278	San Antonio Water System	TX0077801	1,517,000	The sewer mains need replacement due to sags, deterioration, soil movement and to bring the system into compliance with SAWS standards. This project will reduce SSOs in the area. This project replaces approximately 60,000 linear feet of 8 to 24-inch sewer mains.	IIIB	C	\$9,507,394.00				
206	0	11279	San Antonio Water System	TX0077801	1,517,000	SAWS has identified sewer pipelines that have experienced sanitary sewer overflow and need to be rehabilitated at a cost of \$55.7 million, and is completing design on those pipelines. The 2014 Sanitary Sewer Overflow Reduction Project will continue identifying and rehabilitating sewer pipelines that are likely to result in sewer overflows. SAWS has developed a sewer pipeline asset management plan, and the sewer pipelines are prioritized by frequency of overflows. Most of the flow in these sewer lines is treated at the Dos Rios plant, while some flow is treated at the Leon Creek or Medio Creek plants.	IIIB	C	\$55,739,850.00				
207	0	11281	San Antonio Water System	TX0077801	1,517,000	SAWS has identified sewer pipelines that have experienced sanitary sewer overflow and need to be rehabilitated at a cost of \$21.5 million dollars and is completing the design of those pipelines. The 2014 Sanitary Sewer Overflow Rehabilitation Project will rehabilitate the pipelines that have a completed design. SAWS has developed a sewer pipeline asset management plan, and the sewer pipelines are prioritized by frequency of overflows. The most critical projects are rehabilitated first. Most of the flow in these sewer lines is treated at the Dos Rios plant, while some flow is treated at the Leon Creek or Medio Creek Plants.	IIIA	C	\$21,492,400.00				
208	0	11283	San Antonio Water System	TX0077801	1,517,000	System rehab project. This project includes improvements to 4 of the 8 anaerobic digesters at the Dos Rios WRC, including the cleaning of the digesters, repair of digester dome seams and liners, replacement of the existing draft tube mixers with pump-mix system, replacement of the dome hatches and man-ways, dome pressure/vacuum relief assemblies and three-way valves, and replacement of existing digester gas meters and temperature probes. Electrical, instrumentation and control improvements will also be implemented. Phase III of the project will provide the above improvements for Digester Nos. 5 thru 8. The funding is requested for the Phase III design.	I,II	D	\$1,040,870.00		Yes-BC	\$900,000.00

<b>POTW</b>													
38	61	11257	Patton Village	TX0131636	1,557	The City of Patton Village relies on residential septic systems for treatment and disposal of its wastewater. Since these systems are failing or operated poorly, the water quality (specifically the Total Maximum Daily Load of bacteria) of Peach Creek, which is listed in a Watershed Protection Plan, is negatively impacted. The City proposes to construct a new wastewater collection system to provide first time service for the City. The collection system would consist of approximately 60,000 feet of 8-inch gravity flow PVC collection line, 13,200 feet of force main, and 7 lift stations. The City anticipates directing the wastewater to the City of Patton Viollage Wastewater Treatment Plant, which has been designed but not yet constructed. Funds for constructing the WWTP have been committed by USDA-RD. The City anticipates removing over 400 poorly operating, failing, and substandard septic systems from operation as a result of these projects.	IVA	PADC	\$7,808,000.00	70%			
39	61	11084	Bartlett	TX0027006	1,980	The City of Barlett needs to address old deteriorated sanitary and storm sewer collection system to address infiltration/inflow into the sanitary sewers. The City also needs to address aging lift stations that need to be replaced or rehabilitated. The City also needs to remove accumulated sludge from one of their existing treatment ponds to address Texas Commission on Environmental Quality treatment violations. The City proposes to replace deteriorated vitrified clay sanitary sewer piping and deteriorated storm water piping within the city to address inflow/infiltration. The City is proposing to replace one existing lift station with a gravity flow system and rehabilitate an additional lift station. The City is proposing to remove accumulated sludge from one existing treatment pond.	IIIB	PDC	\$8,000,000.00	50%	Yes-BC	\$5,744,000.00	
40	61	11150	Farmersville	TX0047295	3,301	The City needs to increase their wastewater treatment capacity to meet TCEQ 75/90 rule requirements and to accommodate recent growth in the City and extra-territorial jurisdiction. The City is proposing to construct a phased regional wastewater treatment facility and needs to construct trunklines, collection systems, etc to serve the new facility. The City is proposing to construct a new wastewater treatment plant (PIF 10384) install a new diversion sewer (trunkline), new collection system components, including lift stations to transport the sewage to the new treatment plant.	IVB,IVA	PDC	\$7,160,200.00

41	61	11142	Bonham	TX0021814	10,127	The City of Bonham needs to upgrade/rehabilitate several components of their existing wastewater treatment facility to address Texas Commission on Environmental Quality (TCEQ) enforcement orders. The City is proposing to make upgrade/rehabilitate their existing wastewater treatment facility in three phases. Phase I will address immediate needs at the plant headworks; Phase II will include upgrade/rehabilitation of the Sequencing Batch Reactor units, aerobic digesters, filters, and clarification systems; Phase III will include tertiary filtration, phosphorous remove capabilities, controls, electrical, and an emergency generator.	II	PDC	\$3,564,000.00	30%	Yes-BC	\$1,250,000.00	
42	60	11451	Dublin	TX0054348	3,679	The City of Dublin's existing wastewater treatment plant is a pond system which is in need of repair. The City has a discharge permit and has had multiple instances in the past few years of violating the permit limits. Also, the City is under TCEQ Agreed Order for violations relating to sewer discharges within their collection system due to inflow and infiltration events. The City of Dublin proposes to make improvements to both their wastewater treatment plant and collection system. Specifically, the City proposes to remove all sludge from the ponds, replace headworks, add mechanical aeration, and add irrigation equipment and appurtenances to transition the plant to a no discharge permit.	IIIA,IIIB,I,II	PAD	\$1,660,000.00				
43	60	11137	West Tawakoni	TX0064513, TX0133868	2,061	The City of West Tawakoni (City) wastewater treatment plant is in need of repairs to ensure adequate treatment of the wastewater and to maintain compliance with the requirements of the City's TCEQ discharge permit. The City has completed Planning and Design and proposes to construct the rehabilitation and expansion of their wastewater treatment plant. The renovation of the City's WWTP includes the replacement of existing equipment that has reduced functionality due to wear and corrosion. The plant expansion includes the installation of two new clarifiers to increase the treatment capacity.	II	PDC	\$3,022,500.00	50%			
44	60	11113	La Joya	TX0127337	4,064	The City of La Joya needs to complete construction of a new wastewater treatment facility to meet Texas Commission on Environmental Quality capacity requirements. The City needs to complete the construction of a new wastewater treatment plant to increase capacity.	I,II	C	\$8,630,000.00	50%

51	55	11135	Ralls	TX0540003	2,204	The City of Ralls needs to complete the construction of a new wastewater treatment facility and disposal of effluent by irrigation. The City is completing planning and design for a new facultative lagoon wastewater treatment system and needs to complete construction. The planned project consists of: a new fine mechanical bar screen; a new facultative lagoon; 2 holding ponds; effluent pumping station; and disposal of effluent by irrigation.	AC	\$1,970,000.00	50%			
52	55	11152	Glen Rose	TX0033316	2,592	The City of Glen Rose needs to upgrade/rehabilitate their existing wastewater treatment facility to ensure compliance with their permit requirements and the 75% capacity rule in the future. The City needs to expand their reuse system to include additional irrigation capabilities. The City proposes an expansion of their WWTP from 0.60 to 1.0 MGD (Peak Flow of 3.0 MGD). Also, the City proposes to upgrade their WWTP's effluent quality to meet Type I reuse requirements. The project will include new head works, preliminary, primary, secondary and tertiary treatment improvements, and upgrading the disinfection process to UV disinfection. Sludge handling facilities will be expanded. The City's effluent reuse facilities, which now include irrigation on a nearby golf course, will be upgraded to reuse 100% of the flow to meet non-potable reuse needs. The project also includes land application of the effluent on adjacent property.	C	\$8,166,000.00		Yes-BC	\$3,000,000.00	
65	51	11173	San Juan		34,872	The City of San Juan needs to provide first-time sanitary sewer collection and treatment to areas within the City that currently use on-site sewage facilities. The City is proposing to install first time sanitary sewer collection and treatment to approximately 105 homes within their service area. The project includes installation of collection piping, service yard lines to the house connection point, and decommissioning of the on-site sewage facilities.	C	\$1,835,000.00	30%			
73	46	11124	Wimberley		580	Failing septic systems. Construct a collection system (other project), WWTP (other project) and sprayfield for effluent disposal.	C	\$480,000.00		Yes-CE	\$144,000.00	9754,9755
78	42	11121	Wimberley		580	Failing septic systems. New collection system to a new WWTP (other project).	C	\$2,527,440.00				9754,9756
83	42	11402	Laredo		244,731	The City of Laredo needs to construct an new wastewater treatment plant in the northwestern part of town to relieve overloading in existing sanitary sewer lines along Mines Road and IH 35. The City is proposing to construct a new 6 mgd treatment plant in Northwest Laredo to address needed capacity.	C	\$24,000,000.00

11	81	11083	Arlington	TX0022802	The City of Arlington's 2014 & 2015 Residential Rebuilds are replacement segments within the city's collection system. The City's collection system discharges to the TRA CRWS for transporting & treating wastewater flows generated within the city's system. The city pays a cost of \$2.33/1000 gallons transported & treated to TRA for all flows received. A wastewater master plan was developed in 2009, which included wastewater flow monitoring during dry and wet weather periods. When focusing on these two proposed replacement segments, this flow monitoring recorded and I/I amount totaling 89,027 gallons per day. The design criteria to be used for the replacement projects will have a design life of 50 years. It is appropriate to then apply the amount of I/I to be removed with the period of service life of the proposed pipelines to account for the benefit. The I/I equates to a cost to the city for transportation and treatment of \$4,548,300 over the service life of the improvements. T	C	\$2,398,000.00		Yes-BC	\$2,398,000.00	X
12	80	11240	Gustine	TX0117722	100% Green - Reduction of treatment costs and increased energy efficiency	PD	\$99,000.00	30%	Yes-BC	\$99,000.00	X
13	78	11245	Hico	TX0026590	The project includes the design and construction of a reuse system, including the additional materials, equipment and process modifications required for the wastewater treatment plant to produce Type I reuse for the irrigation of parks, baseball fields and softball fields.	PDC	\$2,405,900.00	50%	Yes-CE	\$855,260.00	X
14	77	11118	North Fort Bend WA	TX0099856	This reuse project is eligible for the GRP under the water efficiency category. The cost includes the treatment units, transmission system, and reimbursement for the retrofit of irrigation components. This reuse system will utilize a green alternative to using potable water for irrigation and make up well for the maintenance of the amenity lake levels. By using treated wastewater effluent we are recycling current water supplies, reducing groundwater pumpage and subsidence, and helping to meet the Fort Bend Subsidence District regulations on alternative water usage. This project will hopefully become a catalyst for more reuse projects in the area.	DC	\$10,880,000.00		Yes-BC	\$10,880,000.00	X

<b>POTW</b>											
18	73	11122	Pharr	TX0062219	Treated wastewater will be reclaimed and used to augment the City's Raw Water Supply. The City intends to take treated water from its only source or reclaimed water (Pharr WWTP) and treated in an advance treatment system. The system would include membrane filtration, reverse osmosis, and UV/Hydrogen Peroxide Oxidation. The treated water would then be stored in a buffering pond immediately adjacent to the WWPT. The pond provides a buffer to mitigate any fluctuations in water quality, an additional barrier and monitoring point for public protection, and adds additional storage. The final component is a booster pump station and water transmission main to convey this water to the Raw Water Reservoir.	PDC	\$43,382,451.00	30%	Yes-BC	\$38,316,860.00	X
19	72	11120	Wimberley		The proposed treatment plant will be used to treat the wastewater from the City of Wimberley and the Deer Creek of Wimberley Nursing Home and Rehabilitation Center. The treated effluent will then be used as a subsurface irrigation system fro the Blue Hole Regional Park near downtown. In addition, reclaimed water may be made available to customers within the service area. The proposed treatment plant will be used as a water conservation measure.	C	\$4,456,800.00		Yes-BC	\$1,337,040.00	X
33	65	11131	Brady	TX0034312	The proposed WWTP will have upgraded diffusers, blowers and motors, which will contribute to the overall energy efficiency of the plant compared to the existing and very old equipment. Additionally, the conversion of the plant's disinfection process to UV disinfection will greatly reduce chemical usage for chlorination and dechlorination. This is also an added safety factor for WWTP staff and the surrounding community.	C	\$23,480,000.00	30%	Yes-BC	\$500,000.00	
52	55	11152	Glen Rose	TX0033316	The City of Glen Rose currently has a 210 reuse permit for use of part of the WWTP effluent at the City's nearby golf course (roughly a mile northeast of WWTP). However, due to the current quality of the effluent, the City can only meet Type II requirements for reuse with the existing WWTP processes. This project includes an expansion to provide more treatment capacity at the WWTP, but also to provide improved quality of the plant effluent so that the City can amend their reuse permit for both Type I and Type II reclaimed water uses. This project will also include improvements to the existing reuse distribution system to allow the City to reuse 100% of the plant effluent flow to meet non-potable reuse needs in the City. Also, the expansion of the WWTP will also include an upgrade to the air supply system and secondary treatment process at the WWTP. The upgrade to these systems will include installing VFD drives for the blowers which will increase the efficiency of electricity use	C	\$8,166,000.00		Yes-BC	\$3,000,000.00	X

Intended Use Plan**

<b>Federal Water Pollution Control Act Section</b>	<b>Requirement</b>	<b>Applicable to</b>	<b>Implementation</b>
Section 602(b)(14)	Procurement standards identified in 40 USC 1101-110-4	<u>Equivalency projects</u> with A/E contracts executed, significantly amended, or renewed.	A/E Contracts signed on or after 10/1/2014 that will be funded with FFY 2015 Capitalization Grant (for SFY 2016 IUP projects).
Section 603(i)(1)	Funds available for additional subsidization	Municipal, intermunicipal, interstate and state agencies.	FFY 2015 Capitalization Grant (for SFY 2016 IUP)
Section 603(i)(2)	Establish affordability criteria	Municipal, intermunicipal, interstate, and state agencies.	Complete before 9/30/2015, including public input (for SFY 2016 IUP)
Section 603 (d)(1)(E)	Fiscal Sustainability plan	Projects involving repair, replacement or expansion of treatment works. <b><u>Loans only, not bonds.</u></b>	Applications submitted on or after 10/1/2014
Section 602 (b)(13)	Cost and Effectiveness: Financial assistance condition: recipient has evaluated the cost /effectiveness and selected, to the maximum extent practicable, a project that maximizes water/energy efficiency considering costs.	Municipal, intermunicipal, interstate, and state agencies.	Applications submitted on or after 10/1/2015.

Application is defined as the forms or web-based system that the executive administrator determines must be completed for consideration for financial assistance from the CWSRF.
